

Esplora and Tangram Theatre Company  
in collaboration with the Department of Curriculum Management present

# ALBERT EINSTEIN: RELATIVITIVELY SPEAKING

**Musical comedy meets theoretical physics in this award winning show from the acclaimed team behind *The Origin of Species...***

Ever looked at  $E=MC^2$  and thought... what's that all about then? Ever been curious how they made the atomic bomb? Ever wanted to meet the genius behind the über-coolest moustache in scientific history? Well, your time has come! Multi-award-winning **Tangram Theatre Company's *ALBERT EINSTEIN: RELATIVITIVELY SPEAKING*** will be performing at the new **Esplora Activity Centre** on the **24<sup>th</sup> and 25<sup>th</sup> November, 2015 at 8.00pm** as part of the events celebrating Einstein Through 100 Years Of General Relativity, finally (theoretically) providing the definitive answers about the greatest mind of the twentieth century.

*ALBERT EINSTEIN: RELATIVITIVELY SPEAKING* is a brilliantly inventive hour of physical theatre, songs, science and the würrst sausage jokes ever – complete with the sure-fire hip-hop hit, the 'E=MC<sup>2</sup> rap'. The show **sold out at Edinburgh Fringe Festival in 2013 where it was shortlisted for the Innovative New Musical Theatre Award and went on to win an Off West End Award in 2015**, and follows on from the **Edinburgh smash hit and Adelaide Fringe Best Production and Best Performer nominated Darwin bio-comedy *THE ORIGIN OF SPECIES...*** and **Total Theatre Award-nominated *CRUNCH!*** by the same team of **writer-performer John Hinton and director Daniel Goldman** (co-director of *Stage Solo* Award winner and Olivier nominee *You're Not Like The Other Girls Chrissie*).

Open to everyone from amateurs to astrophysicists old and young, *ALBERT EINSTEIN: RELATIVITIVELY SPEAKING* is a **frantically fast-paced, wonderfully warm-hearted celebration of the ideas, ideals and idiosyncrasies of the man whose theories sparked a revolution** in modern science. **Peer reviewed by a team of leading physicists at Sussex University**, it is vital viewing for anyone who wants to understand the modern world – as well as utterly unmissable for anyone with a sense of humour and spirit of adventure.

### Reviews for Albert Einstein: Relativitively Speaking

**'The clearest - and certainly the funniest - explanation of the Theory of Relativity I know.'**

*John Lloyd (Creator of QI)*

**★★★★★ 'Here's a treasure... handled with something close to brilliance... This one's a winner.'**

*Libby Purves (The Times)*

**★★★★★ 'Hinton expertly makes the most complicated of concepts easily intelligible.'**

*British Theatre Guide*

The show will be followed by a discussion by Dr Jackson Said on Albert Einstein's life and achievements.
