Planetarium Experience:

This includes access to the planetarium exhibits and a choice of one of the following films in the planetarium dome theatre.

Little Eve: Stories of Planet Earth

Eve is small, but her curiosity is boundless. In this full dome show for families, she discovers how the smallest can become the strongest.

Planet Earth is a truly fascinating place. In the vastness of the universe, it is the only known world where life has flourished. But how did it all begin? That is what our new fulldome film, Little Eve, is all about. It offers a captivating experience which blends adventure with scientific discovery.

Eve is small, but her problems feel huge. She is not sure she can stand up to the wolves, those rough, pushy types who always seem to pick on her. So,

she runs away. But her mother understands. To help, she shares three stories that reveal the wonders of life and the strength even the smallest can possess.

Eve's mother tells her about the tiny cell that made life possible, the brave Tiktaalik, a fish that conquered the land, and the clever squirrel who outlasted the mighty dinosaurs. These stories show how even the smallest creatures can change the world.

Little Eve listens, eyes wide, and begins to wonder. What if she's stronger than she ever imagined?

Beyond the Sun – In search of a new Earth

A full-dome film in search of a new Earth: Celeste is a little girl who wants to explore the Universe, find new Earths and know how to find exoplanets.

Description – While Celeste is fighting off sleep in her room by reading a book on astronomy, she receives an unexpected visit from Moon. Together, they will enjoy a journey through the Universe to discover what exoplanets are and how they can be detected.

They observe rogue planets, oceanic worlds and super-Earths. Moon tells her about exoplanet hunters, who observe the sky in search of planets like Earth. Many adventures are yet to come. But first, she needs some rest. Celeste drops off to sleep waiting for Moon's next visit.

Tycho goes to Mars

Finding his way back home is not going to be easy. But if anyone can do it, Tycho can.

Description - Join Tycho, a dog that has a knack for getting into trouble, on his latest adventure as he discovers Mars up-close. See an ancient volcano, a gigantic canyon and help Tycho search for water to power his kennel back home. But how will he find water on Mars when it looks so cold, dusty and dry?

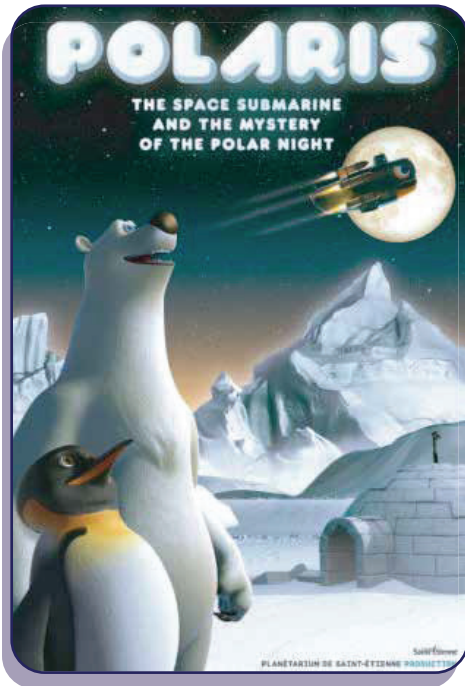

Luckily, he discovers a new friend, Oppy, who is all too eager to help. Oppy - the NASA rover, Opportunity - has lots of experience exploring Mars and hunting for water. She is thrilled to share her knowledge of the red planet with a fellow space explorer.

Polaris – The Space Submarine and the Mystery of the Polar Night

James and Vladimir, a penguin and a bear from the South and North Pole respectively, build an observatory and a spaceship, and see the similarities and differences between various planets.

Description - James, a traveling penguin from the South Pole, and Vladimir, a funny bear from the North Pole, meet on the Arctic sea ice. They become friends, talk about their respective regions and observe the stars together, wondering why the night is so long at the poles of the Earth. Novice astronomers, they are trying to solve this mystery

by reasoning and observation.

Thanks to the rigour of James and the inventive genius of Vladimir, their scientific adventure leads them to build an observatory, and then an improvised spaceship. During a trip around the Earth, extended to Mars and Saturn, they get their answer and discover that the planets have similarities but also differences.
